**Detailed contents**

**Preface**

**PART I  Foundations of accounting information systems**

**CHAPTER 1  Accounting information systems: Theoretical foundation and overview**

- Theoretical foundation of AISs 4
- Introduction 5
- Drivers of business and information system change 5
  - Globalisation 6
  - Deregulation 6
  - Advances in technology 6
  - Outsourcing and downsizing 7
- Systems, data, information and its value 7
- Information needs and business processes 9
  - Information needs 10
  - Business processes 11
- Accounting information systems 16
  - How an AIS can add value to an organisation 16
  - AIS and corporate strategy 17
  - Role of an AIS in a value chain 18
- Why study accounting information systems? 20
- Ethics in accounting and information systems 21
  - Corporate and professional codes of ethics 21
  - Ethical issues in accounting 21
  - Stakeholder analysis framework 23
  - Ethical issues in information systems 23
- Summary and case conclusion 24
- Key terms 25
- **AIS IN ACTION: Chapter quiz** 25
- Ethical issue 26
- Discussion questions 26
- Problems 27

**CHAPTER 2  Fundamentals of business processes and transaction processing**

- **AIS IN ACTION SOLUTIONS: Quiz key** 31

**CHAPTER 3  Systems development and documentation techniques**

- **CASE 1.1  Ackoff’s ‘Management Misinformation Systems’** 31
- **AIS IN ACTION SOLUTIONS: Quiz key** 31

- **CASE 2.1  Bar Harbour Strawberry Farm** 57
- **AIS IN ACTION SOLUTIONS: Quiz key** 59

- **CASE 3.1  Systems development and documentation techniques**

**Introduction**

- Data flow diagrams 65
- Subdividing the data flow diagram 66

**Flowcharts**

- Document flowcharts 72
- System flowcharts 73
- Program flowcharts 77
- Summary and case conclusion 77
- Key terms 78
- **AIS IN ACTION: Chapter quiz** 78
- Ethical issue 79
- Comprehensive problem 80
- Discussion questions 80
CHAPTER 4  Files, database systems and relational databases  

Introduction  
- File versus databases  
- Using data warehouses for business intelligence  
- Advantages of database systems  
- Importance of good data  

Database systems  
- Logical and physical views of data  
- Schemas  
- Data dictionary  
- DBMS languages  

Relational databases  
- Types of attributes  
- Designing a relational database for IS&S  
- Basic requirements of a relational database  
- Two approaches to database design  
- Creating relational database queries  

Database systems and the future of accounting  
- Summary and case conclusion  
- Key terms  

AIS IN ACTION: Chapter quiz  
AIS IN ACTION SOLUTIONS: Quiz key  
Comprehensive problem solution  

CHAPTER 5  Control in accounting information systems  

Introduction  
- Why threats to accounting information systems are increasing  

Overview of control concepts  
- Foreign Corrupt Practices Act and Sarbanes-Oxley Act  

Control frameworks  
- COBIT framework  
- COSO’s Internal Control framework  
- COSO’s Enterprise Risk Management framework  
- The Enterprise Risk Management framework versus the Internal Control framework  

Internal environment  
- Management’s philosophy, operating style and risk appetite  
- Board of directors  

CHAPTER 6  Accounting information system development strategies  

Introduction  

Purchasing software  
- Selecting a vendor  
- Acquiring hardware and software  
- Evaluating proposals and selecting a system  

Development by in-house information systems departments  
- End-user-developed software  
- Advantages and disadvantages of end-user computing  
- Managing and controlling end-user computing  

Outsourcing the system  
- Advantages and disadvantages of outsourcing  

Business process management  
- Internal controls in a business process management system

**PART II  Accounting information system cycles**

**CHAPTER 7  The revenue cycle: Sales to cash collections**

- **Introduction**
- **Revenue cycle subsystem**
  - **Sales order entry**
    - Taking customer orders
    - Credit approval
    - Checking inventory availability
    - Responding to customer enquiries
  - **Shipping**
    - Pick and pack the order
    - Ship the order
  - **Billing**
    - Invoicing
    - Maintain (update) accounts receivable
  - **Cash collections**
- **Revenue cycle information needs and reporting**
- **Summary and case conclusion**

**CHAPTER 8  The expenditure cycle: Purchasing to cash payments**

- **Introduction**
- **Expenditure cycle subsystem**
  - **Process**
- **Ordering materials, supplies and services**
  - Identifying what, when and how much to purchase
  - Choosing suppliers
- **Receiving**
- **Approving supplier invoices**
- **Cash payments**
- **Expenditure cycle information needs**
- **Summary and case conclusion**

**CHAPTER 9  The human resources management cycle/payroll subcycle**

- **Introduction**
- **Human resources management cycle subsystem**
  - **Overview of human resources management process and information needs**
  - **Payroll subsystem activities**
- **Outsourcing options: Payroll service bureaus and professional employer organisations**
- **Summary and case conclusion**

**CHAPTER 10  The production cycle**

- **Introduction**
- **Production cycle information system**
- **Product design**
- **Planning and scheduling**
  - Production planning methods
- **Production operations**
Cost accounting 298
  Raw materials usage data 299
  Direct labour costs 299
  Machinery and equipment usage 299
  Manufacturing overhead costs 299
  Improved control with activity-based costing systems 300
  Improved control with innovative performance metrics 302
Summary and case conclusion 304
Key terms 305
AIS IN ACTION: Chapter quiz 305
Ethical issue 306
Discussion questions 306
Problems 306
CASE 10.1 The accountant and CIM 310
AIS IN ACTION SOLUTIONS: Quiz key 310

CHAPTER 11 The general ledger and reporting cycle 314
Introduction 315
General ledger and reporting cycle subsystem 317
Update general ledger 317
Post adjusting entries 318
Prepare financial statements 319
  Transition from GAAP to IFRS 319
  XBRL: Revolutionising the reporting process 319
Produce managerial reports 324
  Responsibility accounting and flexible budgeting 324
  The balanced scorecard 325
  Principles of proper graph design 327
Summary and case conclusion 329
Key terms 330
AIS IN ACTION: Chapter quiz 330
Ethical issue 331
Discussion questions 331
Problems 331
CASE 11.1 Keeping current with XBRL 334
CASE 11.2 Evaluating a general ledger package 334
AIS IN ACTION SOLUTIONS: Quiz key 334

PART III Fraud, controls and audit in accounting information systems 337

CHAPTER 12 Fraud: Prevalence, prevention and detection in accounting information systems 338
Theories underpinning fraud and control 339
Introduction 340
Accounting information system threats 340
Fraud and its prevalence 343
  Misappropriation of assets 344
Fraudulent financial reporting 345
ASA 240 The Auditor’s Responsibilities Relating to Fraud in an Audit of a Financial Report 346
  Who perpetrates fraud and why 347
Computer fraud 352
  Rise in computer fraud 352
  Computer fraud classifications 353
Preventing and detecting fraud and abuse 356
Summary and case conclusion 357
Key terms 358
AIS IN ACTION: Chapter quiz 359
Ethical issue 360
Discussion questions 360
Problems 361
CASE 12.1 Bookkeepers: Portrait of white-collar criminals 366
CASE 11.2 Heirloom Photo plans 367
AIS IN ACTION SOLUTIONS: Quiz key 369

CHAPTER 13 Cybercrime: Computer attack and abuse techniques 374
Introduction 375
Computer attacks 375
Social engineering 385
Malware 389
Summary and case conclusion 398
Key terms 399
AIS IN ACTION: Chapter quiz 400
Ethical issue 401
Discussion questions 401
Problems 402
CASE 13.1 Shadowcrew 409
AIS IN ACTION SOLUTIONS: Quiz key 410

CHAPTER 14 Information systems controls for system reliability—Part 1: Information security 418
Introduction 419
Two fundamental information security concepts 422
  1 Security is a management issue not a technology issue 422
  2 Defence-in-depth and the time-based model of information security 424
Understanding targeted attacks 425
Preventive controls 425
  Training 425
  User access controls 426
Production cycle: Threats and controls 542
General issues 543
Product design 543
Planning and scheduling 545
Production operations 545
Cost accounting 547
General ledger and reporting cycle:
Threats and controls 548
General issues 548
Update general ledger 550
Post adjusting entries 553
Prepare financial statements 553
Produce managerial reports 554
Summary and case conclusion 554
Key terms 558
AIS IN ACTION: Chapter quiz 558
Discussion questions 559
Problems 559
CASE 17.1 Research project: Impact of IT on cycle activities, threats and controls 573
AIS IN ACTION SOLUTIONS: Quiz key 573

CHAPTER 18 Auditing computer-based information systems 578
Introduction 579
The nature of auditing 580
Overview of the audit process 580
The risk-based audit approach 583
Information system audits 583
Objective 1: Overall security 583
Objective 2: Program development and acquisition 584
Objective 3: Program modification 586
Objective 4: Computer processing 588
Objective 5: Source data 591
Objective 6: Data files 592
Audit software 593
Operational audits of an AIS 594
Summary and case conclusion 595
Key terms 595
AIS IN ACTION: Chapter quiz 596
Ethical issues 597
Discussion questions 597
Problems 598
CASE 18.1 Preston Manufacturing 602
AIS IN ACTION SOLUTIONS: Quiz key 603

PART IV The systems development life cycle process 607

CHAPTER 19 Systems development and systems analysis 608
Theories underpinning systems development life cycle 609
Introduction 610
Systems development 611
The systems development life cycle 611
The players 613
Planning systems development 614
Planning techniques 615
Feasibility analysis 616
Capital budgeting: Calculating economic feasibility 617
Behavioural aspects of change 618
Why behavioural problems occur 618
How people resist change 619
Preventing behavioural problems 620
Systems analysis 621
Initial investigation 621
Systems survey 622
Feasibility study 624
Information needs and systems requirements 624
Systems analysis report 626
Summary and case conclusion 626
Key terms 627
AIS IN ACTION: Chapter quiz 630
Comprehensive problem 631
Discussion questions 631
Problems 632
CASE 19.1 Audio Visual Corporation 638
AIS IN ACTION SOLUTIONS: Quiz key 639
Comprehensive problem solution 641

CHAPTER 20 Systems design, implementation and operation 644
Introduction 645
Conceptual systems design 645
Evaluate design alternatives 645
Prepare design specifications and reports 647
Physical systems design 647
Output design 648
File and database design 648
Input design 649
Program design 650
Procedures and controls design 651
Systems implementation 652
Implementation planning 652
Site preparation, install and test hardware 653
Selecting and training personnel 653
Complete documentation 654
Test system 655
Systems conversion 655
Operation and maintenance 656
Summary and case conclusion 658
Key terms 659
AIS IN ACTION: Chapter quiz 659
Chapter case: Hershey’s big bang ERP 660
Discussion questions 660
Problems 661
CASE 20.1 Citizen’s Gas Company 667
AIS IN ACTION SOLUTIONS: Quiz key 668
Chapter case solution 670

PART V  The REA data model 671

CHAPTER 21 Database design using the REA data model 672
Introduction 673
Theoretical foundation for the REA data model in AIS 673
Quality information for decision-making 674
Database design process 674
Entity-relationship diagrams 675
REA data model 676
Three basic types of entities 676
Structuring relationships: The basic REA template 677
Developing an REA diagram 679
Step 1: Identity relevant events 680
Step 2: Identify resources and agents 682
Step 3: Determine cardinalities of relationships 682
Summary and case conclusion 689
Key terms 689
AIS IN ACTION: Chapter quiz 690
Comprehensive problem 692
Discussion questions 692
Problems 693
CASE 21.1 Practical database design 721
AIS IN ACTION SOLUTIONS: Quiz key 721
Comprehensive problem solution 723

CHAPTER 22 Implementing an REA model in a relational database 704
Introduction 705
Integrating REA diagrams across cycles 705
Rules for combining REA diagrams 708
Merging redundant resource entities 708
Merging redundant event entities 709
Validating the accuracy of integrated REA diagrams 710
Implementing an REA diagram in a relational database 710
Step 1: Create tables for each distinct entity and M:N relationship 710
Step 2: Assign attributes to each table 711
Step 3: Use foreign keys to implement 1:1 and 1:N relationships 713
Completeness check 714

CHAPTER 23 Special topics in REA modelling 726
Introduction 727
Additional revenue and expenditure cycle modelling topics 727
Additional revenue cycle events and attribute placement 727
Additional expenditure cycle events and attribute placement 730
Sale of services 731
Acquisition of intangible services 732
Digital assets 733
Rental transactions 733
Additional REA features 735
Employee roles 735
M:N agent-event relationships 735
Locations 735
Relationships between resources and agents 735
Production cycle REA model 735
Additional entities: Intellectual property 736
Human resources management cycle entities 739
Tracking employees’ time 740
Financing activities data model 741
Summary and case conclusion 742
AIS IN ACTION: Chapter quiz 744
Discussion questions 745
Problems 746
CASE 23.1 Practical database assignment 750
AIS IN ACTION SOLUTIONS: Quiz key 751
APPENDIX: Extending the REA model to include information about policies 754

Glossary 756
Index 780
