Detailed CONTENTS

Preface xviii

Part 1 Studying human development over the lifespan 1
Overview 1

CHAPTER 1 Lifespan developmental psychology 2
Chapter overview 3
Adults can grow psychologically through the whole of life 3
Hallmarks of the lifespan approach to psychological understanding 3
Lifelong development 3
Continuity and change 3
BOX 1.1 Four luminary lifespans 4
Culture and the lifespan 5
Normative lifespan transitions 6
Why is age so important to psychologists? 6
The personal meaning of age 7
BOX 1.2 A case in point: What it means to be 50 8
Personal plans for lifespan development 9
The human lifespan today 9
Social and historical changes in personal age consciousness 10
BOX 1.3 Activity suggestion: Lifeline drawing 10
Will you live to be 100? 10
Culture, age and lifespan development 11
Filial piety and attitudes to age 11
Indigenous ageing: Becoming an elder 12
Development in historical perspective 14
The history of childhood 14
The history of adolescence 15
The history of adulthood, old age and the lifespan 15
Age and society 17
The normative social clock 17
BOX 1.4 Activity suggestion: Age makes the news 17
The problem of ageism 18
BOX 1.5 A pause for thought: Is it wrong to laugh? 18
BOX 1.6 How can you explain it? Ageism is a health hazard 19
The science of lifespan human development 20
Studying change 20
The field of lifespan developmental psychology 20
Core assumptions of the lifespan approach 21
The concept of development 21
Permanent change 22
Qualitative and quantitative change 22
Normative, generalisable change 22
BOX 1.7 Activity suggestion: Development through art 23
Progressive change: The actualising of hidden potential 23

Life-cycle surprises 23
Longitudinal studies with unexpected twists 24
BOX 1.8 How can you explain it? Cheerfulness, conscientiousness and longevity 24
The adult development of ‘late bloomers’ 25
Nurturing development through the lifespan 25
Developmental optimisation 26
BOX 1.9 A case in point: Optimising health education with traditional Indigenous art 27
Parents and developmental optimisation 27
Optimisation through education 27
The optimising roles of health and helping professionals 28
Looking forward 28
Chapter summary 28
For further interest 29

CHAPTER 2 The Science of lifespan development: goals, theories and methodology 30
Chapter overview 31
The scientific goals of lifespan research 31
Three key scientific goals 31
BOX 2.1 Activity suggestion: What can research tell us that we don’t already know? 32
Descriptive research: Picturing psychological development age by age 32
Interpreting descriptive age norms 33
Explanatory research: Creating theories and testing predictions 35
BOX 2.2 How can you explain it? Age differences in IQ 36
BOX 2.3 Activity suggestion: Test your sleuthing skill 36
Analogies for development: Pre-theoretical models 37
The environmental-mechanistic model 37
The organic-maturational model 37
BOX 2.4 Using science: From description to explanation: Why do we age? 38
The dialectical model 38
BOX 2.5 Activity suggestion: Test your taste for the dialectical model of development 39
Optimisation: The goal of applied research 40
Life-cycle surprises and optimisation research 40
The methods of developmental psychology 41
BOX 2.6 How can you explain it? Learning music in childhood boosts mental ability in old age 41
Case studies 41
Naturalistic observation 42
BOX 2.7 A child called Louise 42
Experimental research in developmental science 43
Self-report techniques 43
Developmental research designs: Tracking psychological functioning over time 44
The cross-sectional design 44

A01_PETE6508_06_LT_FM.indd   7
19/09/13   2:09 PM

The baby's birth 97
Stages of labour 97
The uncomplicated delivery 97
Childbirth complications: Prematurity and low birth weight 98
BOX 3.9 Indigenous insight: Birth in a traditional Aboriginal community 98
Long-term developmental consequences of birth complications 99
The transition to parenthood 99
BOX 3.10 A father’s reaction to childbirth 99
Chapter summary 100
For further interest 101

Part 2 Infancy—from birth to age two 102

Overview 102

CHAPTER 4 Infancy: Physical, neurobiological, sensorimotor and cognitive development 103

Chapter overview 104
Behaviour in the first three months 104
Reflex behaviours 104
Crying 105
Culture and caregivers’ responses to crying 105
Soothing the crying infant 106
Indigenous Australians’ soothing practices 107
Sleeping 108
Lifespan changes in dreaming 109
BOX 4.1 Indigenous insight: Dreamtime lullabies 109
BOX 4.2 A case in point: Pleasures and dreams at 10 months of age 110
Culture and infant sleep patterns 111
BOX 4.3 How can you explain it? Cot death: The mystery killer 111
BOX 4.4 Optimising development: Reducing SIDS via neurocognition and learning 112
Solitary sleep versus communal social inclusion 112
Neurobiological and neurocognitive development in infancy 113
Growth of the brain 114
Neurogenesis and neural network connections 115
Synapses: Generating and pruning 115
Myelination 116
Physical growth during infancy 116
Cultural influences on physical growth: Aboriginal children 117
BOX 4.5 How can you explain it? Does owning a TV slow down the body’s physical growth? 117
The growth of beauty 118
The development of motor skills 119
Nature versus nurture in motor skill development 119
BOX 4.6 A case in point: The motor skills of a one-year-old 119
Culture and skill: Aboriginal infants’ motor development 120
The development of sensory and perceptual skills 122
The five senses at birth 122
The development of vision and hearing during infancy 122
Perceptual development 123
Coordinating perceptual and motor skills 124
Cognition and learning during infancy 124
Learning complex contingencies 124
Curiosity and attention 125
BOX 4.7 The world of a 16-month-old 125
Infant learning 126
Piaget’s sensorimotor stage: Concepts of permanence and causality 126
BOX 4.8 Activity suggestion: Grabbing attention of the lifespan 126
The concept of object permanence 126
The concept of causality 127
Contemporary research on infants’ causal concepts 128
Personality, emotion and cognition 129
Gaining trust 129
BOX 4.9 A case in point: Babies learn about blindfolds by being tricked 129
Developing a sense of personal control 130
Learned helplessness 130
Developing self-efficacy 131
Chapter summary 132
For further interest 132

CHAPTER 5 Infancy: Social, emotional and personality development 133

Chapter overview 134
The roots of personality: Infant temperament 134
All babies are different 134
BOX 5.1 Expressing individuality: Two different babies 135
Patterns of temperament 136
Nature versus nurture: Genetic and neurocognitive influences on temperament 137
BOX 5.2 How can you explain it? Prickly Generation X? 138
Variations in temperament over cultures and generations 139
Indigenous Australian infants’ temperaments 139
BOX 5.3 Indigenous insight: Breastfeeding 140
Seeking causes for cross-cultural differences in temperament: Genes versus childrearing 141
Indigenous parenting and personality 142
BOX 5.4 How can you explain it? Cultural paradoxes in early temperament 142
Lifespan perspectives on temperament 143
Does early temperament predict later personality? 143
The goodness-of-fit hypothesis 144
Temperament, parenting and the socialisation process 145
Emotional development in infancy 146
Emotional self-regulation 146
Attachment: The first intimate relationship 146
DETAILED CONTENTS

Reasoning or punishment? Parents’ disciplinary tactics 246
Optimally effective parenting 247
Cultural variations in parenting 248
BOX 8.2 Indigenous insights: Childrearing in remote Indigenous Australia 249
Siblings and psychological development 249
Sibling rivalry and differential parenting 250
Siblings as tutors 251
Siblings and social cognition 251
‘Catching’ a theory of mind from siblings 251
The only child 252
Personality and the self-concept 252
Industry versus inferiority 252
The development of self-esteem 253
Peers as developmental influences 254
Measuring a child’s status in the peer group: The sociometric technique 254
BOX 8.3 A case in point: The pain of social exclusion 254
Are sociometric classifications reliable? 255
The correlates of peer acceptance and rejection 255
Loneliness versus unpopularity 255
Compensating for peer group rejection: Mixed-age peer groups and mutual friendships 256
The development of sex roles 256
The socialisation of children into sex roles 257
Do Millennial boys love dolls? 258
BOX 8.4 Activity suggestion: Conducting an inventory of a child’s bedroom 258
Television and sex-hyping 259
The cognitive development of gender understanding 259
Ages and stages of gender constancy understanding 261
BOX 8.5 A case in point: Why can’t a woman be just like a man? 262
The development of androgyny 262
Theories of gender-role development 264
Freud’s psychoanalytic theory 264
Social learning theory 265
Kohlberg’s cognitive-developmental theory 267
Gender schema theory 267
Comparing theories of sex-role development 268
Culture and social relationships 268
Moral development 269
The development of moral behaviour 269
BOX 8.6 A pause for thought: Do the best minds produce the strongest consciences? 270
The development of moral understanding during childhood 270
BOX 8.7 A case in point: Louise and Taffy in awe of adults 271
Piaget’s theory in the 21st century 272
Social conventions versus moral rules 273
The positive side of morality 274
Helpfulness versus bystander apathy 274
Infants’ altruistic helpfulness 275
Fairness and distributive justice 275
Justice concepts 276
BOX 8.8 Indigenous insight: Cultural contrasts in justice views 277
Chapter summary 278
For further interest 279

CHAPTER 9 Middle Childhood: Physical, neurobiological, cognitive and emotional development in the context of schooling 280

Chapter overview 281
Health and physical growth during middle childhood 281
Physical growth trends 281
Problematic growth: Obesity and malnutrition 282
BOX 9.1 A case in point: Counting calories at age nine 283
BOX 9.2 Lessons from culture: If only I was plump! 284
Television and weight problems 284
Weight, diet and nutrition in cross-cultural perspective 284
Optimising physical growth: Diet and exercise 285
Health, illness and health understanding 285
Neurocognitive development in middle childhood 286
Myelination 286
BOX 9.3 Indigenous insight: Shopping for health 287
Grey matter changes 288
Neurocognitive activity in sleep and wakefulness 288
Lateralisation and the corpus callosum 288
The development of motor and athletic skills 289
Emotional development 289
The development of emotional competence 290
Anger and anger management 290
Fear and anxiety 291
BOX 9.4 Do fears grow as the child does? 292
Cognitive development in the context of schooling 293
Executive functioning skills and cognitive planning 293
Developmental changes in attention during middle childhood 293
BOX 9.5 Activity suggestion: Brain teasers 294
Selective attention 294
Thinking flexibly and strategically 295
Metacognition: Children’s knowledge about thinking 296
Memory and problem solving 296
Executive functioning and cognitive flexibility 297
BOX 9.6 Activity suggestion: Sorting cards 297
Creativity and cognitive flexibility 298
Evaluative thinking: Reflection versus impulsivity 299
Developing literacy 299
Developing reading readiness: Awareness of books and phonology 299
BOX 9.7 Activity suggestion: How do you hold a book? 301
Novice readers 301
BOX 9.8 A case in point: Learning the logic of words 302
Reading for meaning 302
The development of reading in Aboriginal children 302
The motivation to succeed academically 304
The pendulum problem: Hypotheses and possibilities 352
The beam balance problem: Proportionality and reversibility 352
The horizontal plane: Higher-order abstract concepts and the logic of propositions 353
When do formal operations develop? Revisions of Piaget's theory 354
Schooling and formal operations 355
Box 11.3 A case in point: Frustration in a physics class 356
Developmental divergence in peak abilities 356
Cognitive specialisation 357
Assessing Piagetian formal operations in the 21st century 358
Are contemporary teenagers illogical? A cohort-linked decline in formal-operational reasoning 358
Twenty-first century neurocognition and Piaget's theory 358
Adolescent cognition in everyday life 359
Box 11.4 Activity suggestion: Test your own ingenuity. What do you think? 360
Thinking logically about health and illness 360
Thinking about politics and economics 361
Thinking about the mind: Second-order false belief understanding 362
Social cognition and the transition to formal-operational thought 363
The imaginary-audience syndrome 363
Box 11.5 Strutting and fretting on an imaginary stage 364
Health, dating and the imaginary audience 364
Formal operations and sexual risk-taking 364
Moral development during adolescence 365
Box 11.6 Using science: Social media and the imaginary audience 366
Kohlberg's theory 366
Ages and stages of moral growth 368
A critique of Kohlberg's theory 368
Actions speak louder than words: Moral reasoning and behaviour 369
Culture, collectivism and the morality of care 370
Gender and moral reasoning 372
Box 11.7 Expressing individuality: Gender differences in the logic of morality 372
Personality development: The identity crisis 372
Box 11.8 Indigenous insight: Identity crisis resolution as a dialectical balance 374
Box 11.9 A pause for thought: Can you assess identity? 375
Identity statuses 375
Box 11.10 A case in point: Identity exploration through social comparison 376
Consequences of identity growth for personality and adjustment 376
Cultural variations in personality and identity development 377
Developing an ethnic identity 377
Box 11.11 Activity suggestion: Test your multicultural IQ 378
Identity development in Aboriginal Australian adolescents 379
Box 11.12 A case in point: A charming age in Samoa 379
The benefits of an Indigenous Australian ethnic identity 380
Identity development in New Zealand Maori adolescents 382
Box 11.13 A case in point: Identity in Maori women in New Zealand 382
Chapter summary 383
For further interest 383

Chapter 12 Adolescence: Social, personality and relationship development 385
Chapter overview 386
Becoming independent of parents 386
Gaining independence at home 386
Box 12.1 Growth towards independence 387
Emerging into adulthood: Emotional and social transitions 389
The psychoanalytic model: Freud and Erikson 389
Emancipation through dialogue 390
Cultural variations in the process of becoming independent 391
Attachment to parents and peers 392
Working models of attachment 392
Parent–adolescent conflict and communication 393
Family negotiation strategies 394
Learning to negotiate at home 394
Family conflict and adolescent self-esteem 395
Family communication, conflict and identity exploration 395
Parenting styles and discipline strategies 396
Parenting styles and adolescent outcomes 397
Single parents, step-parents and adolescent adjustment 397
Culture and the parenting of teenagers 398
Criminal activity and juvenile delinquency 399
Culture, income and juvenile delinquency 400
Family violence 401
Adolescents and substance abuse 402
Cigarette smoking 402
Drinking alcohol 403
Box 12.2 How can you explain it? Does smoking damage the brain? 403
Other drugs 404
Adolescent suicide 404
Culture and youth suicide 405
Developmental changes in suicide risk 405
Indigenous Australians 406
The positive developmental influences of family and friends 407
Parent–peer cross-pressures 407
### Part 6  Adulthood  420

**Overview**  420

#### CHAPTER 13 Early Adulthood: Physical, cognitive, social and personality development  421

**Chapter overview**  422

- Life events and emergent adulthood  422
- Neurocognitive growth and functioning
  - during early adulthood  423
  - Neurocognition and adult competencies  424
  - Neurocognitive growth spurts  424
  - Adult brain plasticity  424
- Pathways to relationship maturity: Falling in love  425
- What is romantic love?  425
- The many splendours of early romantic love  427
- BOX 13.1 Media watch: The humour of love  427
- BOX 13.2 A case in point: The morning after the ball  428
- Lifespan developmental theories of love  428
  - Equitable love: The development from passion to the keeping of accounts  428
- BOX 13.3 How can you explain it? The rewards of romance  429
- Dialectical mature love  430
- Erikson's theory of personality growth through intimacy  430
- Adult attachment style and relationships
  - The influence of attachment style on the development of love  431

**BOX 13.4 Activity suggestion: Attachment styles of young adults**  432
- Falling out of love  432
- Measuring adult attachment  433
- Adult attachment, culture and relationships with parents  433
- Attachments to love and work  434
- The first career development transition: Entering the economy  435
- Graduating into employment or unemployment  435
- Youth economic inactivity: Psychological and developmental consequences  436
- Indigenous Australian and New Zealand adults and economic inactivity  436
- Career goals, life goals and identity development  437
- Life goals and career goals  438
- The identity crisis and forging an identity at work  440
- Career exploration and identity search  440
- The first stages of career development  441
- Trial commitment  441
- Adjusting to the job  441
- Marriage, culture and psychological growth  442
- Cohabiting versus legal marriage  443
- The domestic division of labour  443
- BOX 13.5 Indigenous insight: An Aboriginal arranged marriage  443
- Same-sex couplehood  444
- What predicts divorce?  445
- The transition to parenthood  446
- The advantages and disadvantages of parenthood  446
- Becoming a new parent  447
- The later challenges of parenthood  448
- BOX 13.6 The delights of fatherhood  449

**Chapter summary**  449

**For further interest**  449

#### CHAPTER 14 Middle Adulthood: Physical, cognitive, social and personality growth  450

**Chapter overview**  451

- Physical and motor development in middle adulthood  451
  - Neurocognitive plasticity  452
  - BOX 14.1 A pause for thought: Can playing golf change your brain?  453
  - Adult brain growth  453
- Nurturing the development of the adult brain  453
  - Enriched experience and adult brain growth  454
  - Do men's and women's adult brains develop differently?  454
  - The gain–loss dialectic in adult neurocognition  455
  - The psychology of adult gender differences  455
- Personality development in adulthood  456
  - Lifespan personality growth  456
  - Developing the need to be needed: Generativity versus stagnation  457
  - Lifespan changes in androgyny  458
- Mature adults' cognitive development  458

Part 7  Old age and the end of the lifespan  515

Overview  515

CHAPTER 16 Old Age: Physical, neurobiological, sensorimotor and cognitive development  516

Chapter overview  517

What age is old age?  517
The young-old versus the old-old  518
Ageism and fear of ageing  519
Personal optimism about ageing
BOX 16.1 A case in point: How does it feel to be 70 years old?  520
Cross-cultural perspectives on ageing
Old age in Western versus non-Western cultures  521
Age and the sociocultural environment  522
BOX 16.2 Indigenous insight: An artistic seniority  522
BOX 16.3 Lessons from culture: Age and etiquette  524
The interaction of biology and culture in human ageing
Cultural environments and biological ageing  525
Health attitudes, preventative health practices and physiological ageing  526
The biological ageing process
Ageing of the hair and skin  527
Ageing of internal physiology
Hormonal changes  527
Ageing of the bones and teeth  528
Ageing of the sense organs and perception  528
The psychological impact of biological ageing
Neurocognitive ageing
BOX 16.4 Test yourself: Are you health-conscious or a victim of ageism?  529
BOX 16.5 Erasing the effects of neurocognitive ageing by playing video games  530
Theories of biological ageing
Disease theories  531
Homeostasis and the compression of morbidity  531
Cellular theories of ageing  531
Environmental insult theories of ageing  532
Optimising health and fitness in old age
Diet and healthy ageing  533
BOX 16.6 A case in point: Two different women face ageing in France  533
Exercise and health in old age  534
A healthy lifestyle: Avoiding avoidable risks  534
Ageing and sport
The processes of cognitive ageing: Memory
Lifespan changes in memory performance  536
Strategic compensation: Optimising memory performance in old age
BOX 16.7 A case in point: Absent-minded professors  536
Motivation, lifestyle and memory  538
Metamemory, self-efficacy and personal control
Autobiographical memory  539
BOX 16.8 Activity suggestion: Who remembers what?  539
Memory and personality: Life review and reminiscence  540
Life review and psychological wellbeing  541
The processes of cognitive ageing:
Intelligence
BOX 16.9 A case in point: Taking a PhD exam at 80  541
Age and IQ scores: A critical look at the scientific evidence
One IQ or many? The different kinds of adult intelligence
Fluid versus crystallised intelligence  544
Speeded versus carefully considered performance  545
Creative versus academic intelligence  545
Successful cognitive ageing
BOX 16.10 Indigenous insight: The creativity of a senior Anmatyerre custodian of the land  546
Wisdom
Culture and wisdom
BOX 16.11 Indigenous insight: A wise elder  549
Eastern and Western models of wisdom: A dialectical balance  550
BOX 16.12 Do you have a taste for Eastern or Western wisdom?  550
Cultivating wisdom through lifelong learning

CHAPTER 17 Old Age: Social, emotional and personality development  553

Chapter overview  554
Successful social ageing
Social roles and relationships in old age  554
Is the rocking chair the way to go?  555
Disengagement theory
Three postulates of disengagement theory  555
Thinking critically about disengagement theory  556
BOX 17.1 Ask yourself: A case of disengagement  557
Culture and disengagement  557
BOX 17.2 A case in point: The continued pursuit of a committed life  557
Activity theory
Do people disengage or remain active in old age?  559
Should old people disengage or stay active?  560
Longitudinal research evidence on social ageing  561
Personality continuity theory
Integrated adults  563
Less-than-optimal social ageing
BOX 17.3 A case in point: Integrated elderly adopt life patterns to suit earlier personalities  563
The British longitudinal personality study  564
Socioemotional selectivity theory
Older marriages and socioemotional selectivity theory  565
Comparing disengagement, activity, continuity and selectivity theories 566
Conflict-resolution strategies in mature relationships 566
Cross-cultural studies of social ageing 567
Personality, culture and choices of where and how to live 567
Culture, gender and residential choices 568
BOX 17.4 Lessons from culture: Residential care in China 568
The older person and the internet 569
The developmental benefits of mixed-age social contact 570
Personality and adjustment in old age 571
The development of the self-concept in old age 571
BOX 17.5 Test yourself: How does your age self-concept measure up? 572
Motivation, personality and personal control 572
BOX 17.6 How do you explain it? A life-or-death experiment in a nursing home 573
Aged health care and personal control 573
Stress and coping 574
Coping with stress in mature adulthood 574
Developmental gains in coping skills during old age 575
Integrity: The crisis over wisdom versus despair 576
Sexuality in old age 576
BOX 17.7 Is sex in old age a joke? 577

CHAPTER 18 The End of the Lifespan: Death, dying and bereavement 580

Chapter overview 581
Death as a lifespan developmental process 581
Death through the lifespan 582
Longevity in the world today 582
Centenarians and the ageing population 583
How to live to be 100 583
BOX 18.1 A case in point: Extreme longevity 583
The tragedy of Indigenous Australians’ curtailed longevity 584
Promoting health and longevity in Indigenous communities 584
BOX 18.2 How can you explain it? Indigenous versus non-Indigenous Australians’ longevity 585
The psychological impact of population longevity 586
The timing of death and lifespan psychological development 587
BOX 18.3 A pause for thought: How psychology’s causal influence on longevity transcends methodology 587
Death’s natural causes 587
Social influences on longevity 588
Nature versus nurture in predicting personal longevity 588

BOX 18.4 Activity suggestion: How long will you live? 589
Development of knowledge, beliefs and feelings about death over the lifespan 589
Children’s beliefs about death 589
BOX 18.5 Activity suggestion: Death quiz 590
Developmental changes in children’s death understanding and death anxiety 591
BOX 18.6 A pause for thought: What does a mature understanding of death consist of? 592
Death understanding in adolescence and adulthood 593
BOX 18.7 A case in point: Thoughts about death from toddlerhood to adolescence 594
Death anxiety in adolescence and adulthood 594
BOX 18.8 Activity suggestion: Test your own death anxiety 595
Death anxiety in old age 595
The influence of close encounters with death 597
The process of dying 597
Stages in adjustment to death 598
BOX 18.9 A case in point: Dying courageously 599
A critique of Kübler-Ross’ theory 600
Choice and personal control 601
The rights of the dying and living wills 601
The hospice 602
Cultural variations in dying and the acceptance of death 603
Indigenous Australians’ and New Zealanders’ death attitudes and practices 603
BOX 18.10 Indigenous insight: Cultural cooperation in terminal care 603
BOX 18.11 Lessons from culture: Wishes fulfilled 604
Death and dying in cross-cultural perspective 604
Bereavement 604
The management of grief 605
Widows and widowers 606
BOX 18.12 A case in point: Staying involved after death 606
The immediate aftermath of spousal bereavement 606
Identity development after the widowhood transition 607
Positive psychological development during widowed life 608
Widowhood and culture 609
Gender, bereavement, divorce and individuality 609
Chapter summary 610
For further interest 610
In a nutshell: The whole lifespan 612
